PROFESSIONAL SUMMARY

Bachelor of Computer Applications student (CGPA 8.66) with a strong foundation in data structures, algorithms, object-oriented programming, and database management. Experienced in building full-stack web applications using Java, Python, React, and Node.js, along with AI/ML and computer vision projects. Comfortable working across the stack with REST APIs, SQL/NoSQL databases, and version control (Git), supported by certifications from JPMorgan, Deloitte, Infosys Springboard, and Tata.

EDUCATION

Dr. Virendra Swarup Institute Of Computer Studies

Bachelor of Computer Applications (BCA) | CGPA: 8.66/10 | 2024 – 2027 (Expected)

Mary Jesus Education Centre

Intermediate (Class XII) | 81% | 2023 – 2024

EXPERIENCE

Independent Programming Practice

- Solved a range of basic-to-intermediate level problems in Java and Python to strengthen core programming logic.
- Practiced recursion, arrays, strings, and object-oriented programming (OOP) concepts through consistent problem-solving.
- Implemented logic-based programs and problem-solving exercises, building strong data structures and algorithms fundamentals.

PROJECTS

E-Commerce Website | Full-Stack Web Technologies

- Designed and developed a full-stack e-commerce application featuring secure user authentication, dynamic product listings, shopping cart functionality, and database-driven operations with a responsive UI.

Personal Portfolio Website | React.js, Vite, Tailwind CSS

- Developed a responsive, futuristic 3D portfolio website to showcase technical skills, projects, and certifications through an interactive, AI-inspired user interface.

AI Resume Analyzer | Python, Streamlit

- Developed an AI-powered resume analysis application that evaluates ATS compatibility, extracts key skills, matches resumes against job descriptions, and generates personalized improvement suggestions with an overall resume score.

Face Detection System | Python, OpenCV, Streamlit

- Built an AI-powered face detection web application that identifies faces in uploaded images and live webcam feeds, implementing real-time bounding boxes, detection statistics, and an interactive UI.

Bengaluru House Price Predictor | Python, Pandas, Scikit-learn, Streamlit

- Built a machine learning-based price prediction model to estimate property prices using features such as location, BHK, area, and number of bathrooms.

SKILLS

Programming Languages: Java, Python

Core CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems

Backend: Node.js, DBMS, MongoDB, REST APIs

Frontend: HTML, CSS, JavaScript, React

Tools & Version Control: Git, GitHub, VS Code, Spring Tool, MySQL, PostgreSQL

AI/ML: Machine Learning, Artificial Intelligence, Classification Models, Data Preprocessing, Clustering

Python Libraries: NumPy, Pandas, Scikit-learn, OpenCV, Matplotlib, Streamlit, Google Colab, Jupyter Notebook

CERTIFICATIONS

- JP Morgan Software Architecture Job Simulation – Forage
- Cyber Job Simulation – Deloitte Forage
- Full Stack Web Development – SKDeft
- AI/ML – SKDeft
- Web Development – SKDeft
- Java Fundamentals – Infosys Springboard
- GenAI Powered Data Analytics Job Simulation – Tata Forage
- Generative AI Content Creation – Adobe
