

Job Search & Fit Analysis Report

Prepared for: Piyush Kumar | Fresher / Final-Year BCA Student | Kanpur, Uttar Pradesh

1. Professional Profile

Current Role	Final-Year BCA Student, Dr. Virendra Swarup Institute of Computer Studies (CGPA 8.66)
Experience	0 years professional experience (fresher) — strong project & certification portfolio
Key Skills	Java, Python, JavaScript, React, Node.js, HTML/CSS, SQL (MySQL, PostgreSQL), MongoDB, REST APIs, Git/GitHub
AI/ML Skills	Machine Learning, Classification Models, Data Preprocessing, NumPy, Pandas, Scikit-learn, OpenCV, Matplotlib, Streamlit
Domain Expertise	Full-stack web development and applied AI/ML; no specific industry vertical yet
Current Company	None (Student)
Location	Kanpur, Uttar Pradesh
Notable Projects	AI Resume Analyzer, E-commerce Website, Face Detection System, 3D Portfolio Website, Bengaluru House Price Predictor
Certifications	JP Morgan Software Architecture (Forage), Deloitte Cyber Job Simulation (Forage), Full Stack Web Dev (SKDeft), AI/ML (SKDeft), Java Fundamentals (Infosys Springboard), Tata GenAI Data Analytics (Forage), Adobe Generative AI Content Creation

2. Job Search Criteria

Target Titles	Software Developer Intern / SDE Intern
Preferred Company Types	Startups, product companies, IT consulting/service firms open to freshers
Preferred Locations	Any major Indian city (Hybrid preferred)
Salary/Stipend Expectation	Rs. 5,000 - Rs. 15,000 / month
Exclusions	None specified
Posting Recency	Prioritized last 30 days

3. Top Matching Opportunities

Company	Role	Location	Posted	Link	Match	Why It Fits	CTC
Novalyx Tech	Software Developer Intern	Bengaluru (Hybrid)	Jul 2, 2026	Apply	92%	Exact stack match: Java, Python, React (basic), MySQL, Git. BCA/final-year eligible. Hybrid mode.	Rs. 15,000/mo
Fusionpact Technology	Full-Stack Developer Intern (Python & React)	Remote/Hybrid	Mar 6, 2026	Apply	88%	Python + React + REST APIs match E-commerce & Resume Analyzer projects. Open to strong freshers. PPO path.	Not disclosed
INFRAHUB Technologies	AI Intern	Pune	Jun 27, 2026	Apply	80%	Wants Python, Pandas, NumPy, Scikit-learn - all on resume. GenAI certs help bridge LLM exposure gap.	Rs. 8,500-10,000/mo

Company	Role	Location	Posted	Link	Match	Why It Fits	CTC
Shyena Tech Yarns	AI Engineer Intern	Pune	Jul 1, 2026	Apply	78%	Strong overlap with ML/AI projects (Face Detection, House Price Predictor) and Python/Scikit-learn skills.	Not disclosed
Xcrino Business Solutions	MERN Stack Intern	Delhi (Onsite)	Jun 26, 2026	Apply	65%	Strong on Node.js/React/MongoDB, but listing asks for 1 yr experience - a stretch for a fresher. Onsite only.	Rs. 5,000-8,000/mo
GT Connect Pvt Ltd	Web Developer Intern	Delhi	Jul 10, 2026	Apply	60%	General web dev fit (HTML/CSS/JS), but role skews frontend-only, less senior than full-stack profile.	Not disclosed

Excluded: Business Analyst Intern, WordPress Developer Intern, IT Project Coordinator Intern, QA Intern - off-target for an SDE-track fresher; System Engineer / AI Tester roles - infra/testing focus, weak skill overlap.

4. Most Commonly Required Skills Across Postings

- React.js - appears in nearly every listing
- Python - universal across both dev and AI-tagged roles
- REST API design/integration
- Git/GitHub
- Node.js / Express (for MERN-style roles)
- SQL (MySQL/PostgreSQL) / MongoDB
- Basic ML libraries (Pandas, NumPy, Scikit-learn) - for AI-tagged roles

5. Skill Gap Analysis

Strong on: Java, Python, React, Node.js, MongoDB, SQL, core ML libraries - covers roughly 90% of what's being asked.

Gaps to close:

- TypeScript - increasingly a "preferred" skill on MERN/full-stack listings
- FastAPI/Django REST Framework - several Python roles want a proper backend framework beyond scripts
- Docker basics - shows up as "good to have" repeatedly
- LLM/RAG/Prompt Engineering hands-on - certs mention GenAI conceptually, but postings want practical API exposure (OpenAI/Gemini/HuggingFace)
- Testing practices (unit/integration tests) - not currently on the resume

6. Market Demand Insights

- Fresher-friendly internships cluster heavily around Bengaluru, Pune, and Delhi-NCR - far more volume than Kanpur/Lucknow, which had almost no direct listings.
- AI/ML internship demand is rising and often accepts freshers with project-based experience only (no work history required) - plays to strength given 3 of 5 projects are ML/AI-based.
- Stipends for fresher SDE/full-stack interns typically run Rs. 8,000-Rs. 15,000/month, matching stated expectations.
- "Remote/Hybrid" is increasingly common even for interns, especially at smaller product/consulting firms.

7. Recommendations to Improve Interview Chances

- Add a dedicated "Skills - Backend Frameworks" line naming FastAPI/Spring Boot explicitly, since several JDs filter on this.

- Deploy projects live (Vercel/Render/Railway) and link them - a live demo beats a GitHub link alone.
- Pick up one LLM-integration mini-project (e.g., wire OpenAI/Gemini API into the Resume Analyzer) - directly closes the GenAI gap multiple listings flagged.
- Learn Docker basics - a weekend's worth of learning covers most "good to have" mentions.
- Tailor the resume per application - lead with ML projects for AI Intern roles, lead with E-commerce/Portfolio for full-stack roles.

8. Overall Fit Assessment

The profile is a strong fit for fresher-level Full-Stack and AI/ML internship roles in India's product/consulting startup segment. Project depth (5 diverse, deployed-style projects) and certification breadth (JP Morgan, Deloitte, Tata Forage simulations) put this candidate ahead of a typical fresher applicant pool. The Rs. 5,000-15,000/month target is realistic and achievable - the Novalyx and INFRAHUB roles above already meet or exceed it. The main blocker isn't skill level, it's geographic reach: almost no listings originate from Kanpur/Lucknow directly, so targeting Bengaluru/Pune/Delhi-NCR hybrid or remote-first roles is recommended.
